ALEXANDRIA PORTLAND CEMENT CO.

Minutes of meeting on demonstration of ECOFOR technology and the device .

In compliance with the agreement with production sector manager APPCC Chem. Abdelkader MoKhtar and director of Kadous Co. Mr Ezzat Kadous in December of 1996 was passed the demonstration ECOFOR technology and the device invented by ECOFOR CO. Russia. technology and the device is intended to increase the capacity of cement mills. Russian side was introduced by Dr. Gloukharev N. general director. On the other hand the Egyptian side deligated the following specialists to attend and cooperate with the Russian side on the demonstration: Chem. Sayed Moustafa, eng. Ahmed Kamal. ECOFOR device was connected to the cement mill and separator, the results of the demonstration are the following:-

- 1) . The capacity of the new cement mill N 7 closed circuit system of F.L.SMIDTH by using ECOFOR device was increased from 50 t/h to 56,2 t/h or 12,4% ,with less specific power consumption.
- 2) . Milling balls inside the mill were cleaned from hard cement coats.

Both sides estimate to be proved that the using of ECOFOR technology and the device increases the productivity and has a positive economic effect.
