Report.

About the test of ECOFOR device and the method for intensification of milling.

In accordance with the agreement between Managing Director "Raysut Cement Company" Mr.Said Bin Ahmed Al-Rawas and Vice Chairman "Hamdan Trading Group" Mr.Saeed Masoud Al-Maraikh the tests of "ECOFOR" devices have been placed on the cement and raw mills of "Raysut Cement Company" in February 1998.

General Director Dr. Nikolay Gloukharev has been involved from "ECOFOR" company ,Russia.

Works Manager Mr.Tapash Chakraborty and Production Supervisor Mr.R.Siva Subra Maniam have been involved from Raysut Cement Company."

Engineer Mr.Adel Abd Alim has been involved from "Hamdan Trading Group".

One of "ECOFOR" devices was connected to the cement or raw mill and another to their seperators.

During the test the liquid grinding aids were replaced from using in the cement mill at all by "ECOFOR" device without any changing of the capacity of the cement mill and the same blain.The ejections of cement dust to the atmosphere were decreased.The differential pressure on the dust filter was decreased 28% down.

During the test the capacity of the raw mill was increased 12% up.

Both sides estimate to be proved that the using of "ECOFOR" method and the device has a positive economical and ecological results.
